## **GIANT LIST OF IDEAS FOR BEING HOME WITH KIDS**

*( for: actual quarantine, school closures, weekend social distancing, anytime!)*

Thanks to the [Princess Awesome & Boy Wonder](#) Community for the amazing suggestions!!

- Have each kid pick a topic they'd like to learn about & spend 30 mins each day on that topic
- Spend one day reading every single picture book we have in the house
- Bake something every day
- Have each kid write a letter and/or emails to a different friend or family member each day
- Use all of our building toys on one giant structure
- Wash our hands!!!!
- Races of various kinds in the backyard (hopping on 1 foot, crabwalk, walking backwards, etc.)
- Try stop motion animation with playdough
- Facetime grandparents a lot
- watch everything on Disney+
- inventory the plants & wildlife (from bugs on up) in your yard.
- learn the parts of plants/flowers & how they function (bonus if they learn the Latin names).
- write a short story & illustrate it.
- learn how to do simple book binding.
- make paper (from your old mail!)
- [GoNoodle!](#) Great for guided movement, relaxation, etc.
- Board games, card games
- Legos.
- Lots of reading, playing with the dog, etc
- Working on learning to sew using stuff we have on hand.
- Card making/scrapbooking projects (mostly for me but kids can do it too).
- Get seeds and start gardening.
- Make tents and reading caves : ) flashlights, tidy snacks, books, and pillows!
- Have a shadow show in the reading tent (we used blankets over chairs or a table)
- Get binoculars and learn about the birds near your house, look them up on google and search for their birdcalls on YouTube
- Learn how to make a stuffed animal
- Play with cornstarch and water and cheap action figures
- many educational websites are waving fees if your students school is closed
  - [Here's a list of all of them](#) that are waving fees
- Collect a bunch of tape markers and cardboard boxes. That'll keep them busy for a day or two.
- Watch all hand washing videos & vote on your favorite. Discuss why each is good, helpful, funny. The Holderness parody one is hilarious.
- Pick your favorite song with a 20-sec refrain or verse perfect for hand washing length of time.
- Family puzzles. Ones that are [500-1000](#) pieces and a challenging but not frustrating picture
- Team up & clean & organize each kid's space, making a donation box for each. Parents included.
- Have a board game day
- kids can also make their own games! Board games, card games, you name it!
- Write a story cooperatively. One person picks a character & the other picks a setting & then go gangbusters together.
- Any and all art is fun at home: beading, painting, drawing, play dough or kinetic sand, sewing, etc.
- Massive board game tournament with all the (mostly forgotten) board games we own!
- Stolen from "growing up global fb page"
- yoga at home. There are kid-friendly YouTube videos and printed cards with poses.
- Zumba or Dance-along videos on YouTube
- Pinterest. There are tons of ideas for activities, games, etc.
- Draw self portraits on blank faces
- color coded different interesting places on a map.
- Draw maps of places & then make directions from one place to another to see if someone else could follow it.
- Scavenger hunts, indoor treasure hunts where they follow clues through the house to a "treasure" at the end (could be candy, a movie, whatever), and a lot of charades.
- Make videos teaching kids how to write code.
- There are a few easy "kitchen chemistry" type science experiments that are easy to do, like making slime, baking soda and vinegar reaction, etc.
- Put food coloring under the baking soda in a mini muffin pan and used Pipette to drop vinegar in and then you can see the color!
- There are a bunch of ideas on [the lab section of our webpage!](#) And we have letters from women in STEM around the world!
- give the dogs a bath and brush
- wash and clean out the car (mostly their food trash and dirty socks)
- play sidewalk chalk outside
- glow stick party
- popcorn + movie marathon
- Listen to kid podcasts - we love story pirates and smash boom best.
- Declutter toys!

- Have an Olympics with a bunch of events competitions - funny ones, helpful ones like cleaning and really fun ones like minute to win in style.
- Learn new card games
- learn to make sushi!
- [Lots of art projects!](#)
- Dig up all the activity books, presents, etc that never got played with, and use those!
- There's always time tested building a tent in the house with blankets and chairs. Great for just before nap time.
- Do a study on planets, then have the kids create their own planets- how big is it, where in the universe is it located, atmosphere conditions, can it sustain life, how long is a day/year, name it, etc.
  - spread planets out around the house to show "approx." distance from each other.
  - [Watch this](#) to learn about relative distance
- Design a new space craft, draw plans, then create out of legos or household items. Spend some time pretending you're on different planets with different gravity, you could seriously spend a whole week on just fun space activities.
  - But that's not limited to space- these ideas would work for animals, geography, body systems, historical events/time periods, etc. Beyond that, do some fun physics experiments like making a bridge out of straws, egg drop protectors, paper airplanes, etc.
- [PuppetMaster](#): an app where you can animate anything from a drawing to a stuffed animal.
- Practice spinning poi
- Puzzle races: put several puzzles (20+ piece puzzles) in a paper bag and shake it up. Pour pieces out and give each person the puzzle box they are to put together. Go! (Cooperation tends to be a result as pieces are traded.)
- Dig through cabinets and figure out recipes for that thing you got at the grocery store and thought "this is interesting surely it can be used for something!" And then make it!
- Audible!
- Make ice cream
- Make and play with Play dough
